

# Zanibal MyWealth

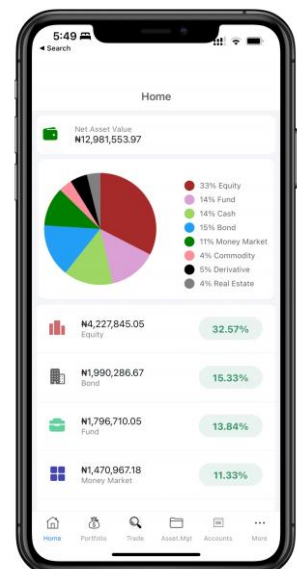

A suite of world class scalable, reliable, multi-asset class, multi-exchange wealth management and trading applications.

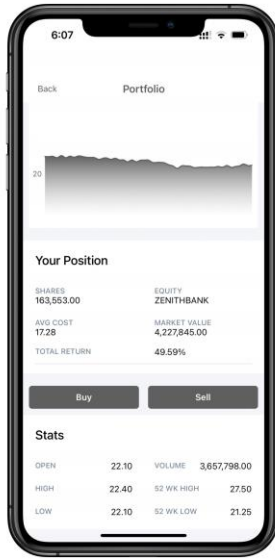

Zanibal's MyWealth (MW) is a suite of research & investment management applications integrated with your back office. With MW, your clients can open accounts, trade in exchange listed securities, invest in fixed deposits, mutual funds, discounted instruments, etc. using web portals and native mobile apps.

A platform that combines real time market data with your asset ledgers and pre-trade risk management is the backbone of every firm's investment management process. The key benefits of such a platform include improved execution quality, reduced risk, increased transparency and reduced cost of transactions.

With Zanibal MyWealth, your client is equipped with a simple and powerful application:

- Available on any device with an intuitive user interface.
- Effective decision making using real-time charts and advanced analysis tools.
- Financial News and Market Analysis from leading news providers.
- Multi-Asset Class, Multi Exchange & Multi-Currency capabilities.

### Accessibility and Ease of Use

Zanibal's MW allows you trade and invest from anywhere. Whether at home, at the office or in transit all you need is a mobile device and reliable Internet connection.

### Integration with the Back office

With a seamless integration to the Zanibal back office, MW integrates your transactions, including trading of equities, fixed income and derivatives across several markets.

### Market data & Research

With real time Market Data from Multiple trading venues, MW gives you in-depth market information on the markets that are important to you. MW provides live streaming of real-time quotes and trades, news and other market events.

### Get Notified

Receive real time notification on your cash transactions, trade confirmations, investment letters, dividends etc. without leaving the application.

### See what is trending

See what is trending in the market, create and manage your own watch lists and receive notifications when your price limits are triggered.
